PUBLIC SAFETY AND ELECTRICAL REQUIREMENTS FOR KALAMUNDA SHOW STALLHOLDERS.

WorkSafe - Department of Commerce, Western Australia has advised the Organisers, the Kalamunda and Districts Agricultural Society that the following must be observed.

1 PREVENTION OF INJURY.

Dangerous projections such as Star Pickets and tent pegs must be rendered safe in some way. Plastic caps on the star pickets are ideal, but some method must be employed that will ultimately prevent injury to a person coming into contact with any item that may cause injury.

2 ELECTRICAL EQUIPMENT.

All Stalls using electrical equipment on Kalamunda Show Grounds must have their appliances and electrical leads (this includes lights) with a current label/sticker

This label/sticker should state the date that the appliance/equipment was tested, the relevant Australian standard to which it was tested and signature of the person who carried out the checking and testing. In accordance with Australian Standard AS 3760-2003: "In-service safety inspection and testing of electrical equipment".

Also in line with OH&S requirements.

This also includes people using their own generators for power

3 ONSITE POWER

As power to the site is limited the following restrictions must be observed.

- **A maximum of two 150 watt floodlights are allowed per stall.**
- **No 500 watt lights are permitted**
- Fluorescent lights are not permitted as experience has shown that they can cause circuit breakers to drop out thereby causing inconvenience to others by cutting all power.
- Each stallholder is strongly advised to use a safety switch or Residual current device within their stall.
- Long extension leads (20-30 Meters minimum) will be needed to reach power outlets on the ground.
- **Power is supplied for NIGHT TIME LIGHTING, EFTPOS machines, COMPUTERS and overnight Fridge requirements only.**
- **Full power connection only available in Food Court** – leads can only be connected once a Kalamunda Show worker has verified your equipment and leads have meet current standards, overnight power for fridge is available
- Other needs beyond this (e.g. cooking) will have to be provided for by the stallholder by means of **SILENCED GENERATOR**. Non-silenced generators will not be allowed to run during show hours
- **Please note:** There will be an audit of all Electrical components such as lights, flexible leads, extension leads, portable outlet devices and residual current devices by an Authorized (Certified) Electrician during the Show and any component not having the correct tagging will be disconnected.

Should you have any queries please contact the Site Coordinator
